

# 2023-2032 Biomass Tax Credit

## CERTIFICATE OF EFFICIENCY

Applicable systems, whether they are stoves purchased to heat space or larger, whole-home heating systems, once again qualify for a renewable energy investment tax credit (Section 25(C) of the Internal Revenue Code). Beginning in 2023, consumers buying highly efficient wood or pellet stoves will be able to claim a 30% tax credit, capped at \$2000 annually. The credit is for appliances installed between January 1, 2023 and December 31, 2032. To be eligible for this credit the appliance must have a thermal efficiency of at least 75% (HHV). Please refer to the HPBA website for further information.

*All our units are independently tested by:*

**OMNI-Test Laboratories, Inc.**

5465 SW Western Avenue, Suite G Beaverton, OR 97005

### QUALIFYING UNITS

- Chatham Insert
- Davenport Insert
- Kinderhook Freestanding
- Chatham Freestanding
- Davenport Freestanding
